8. The vehicles transported comprised between 176 and 182 armored force vehicles, fourteen command tanks, 200 to 220 trucks, some workshop trucks, miscellaneous equipment and ammunition. The tanks carried were similar to the T-43 except that the barrel of the gun had a single muzzle brake. The weight of each tank was estim ted at thirty-eight tons; the gun, which was of 75 or 76.2 mm, had a barrel about 3.2 m long; the engines were air-cooled Diesels; the tracks, which were about 75 cm wide

The command tanks were of a somewhat lighter type, weighting about twenty-eight tons. Instead of a gun they had turret unlike that of the T-43; they were equipped with W/T, and a tubular metal framework was erected over the vehicles. 50X1-HUM
